CURRICULUM SUMMARY

Student in computer science and business administration and management. I consider myself an efficient and a responsible person when a great capacity of sacrifice when it comes to finishing or working on projects. With great interest in data analysis and its application for making decisions in the business world: the function and performance of artificial intelligence in the future of society; and the study and execution of risk actions in different business areas (Venture capital and Private equity). I perceive myself as a person who gives everything in the activity it is performing in order to achieve the best possible result. And if I do not know something, I do not stop until I understand it. Wanting to improve and learn new things.
